

# Statement on Counterfeit Components

---

The growing problem of counterfeiting components is one that is plaguing the electronics industry. These counterfeit parts fall short of our quality standards and can cause major disruptions in the supply chain due to this lack in quality. We are committed to ensuring that our products are of the best quality and genuine. Venkel has complete lot traceability for all the products we supply and can verify label authenticity if required.

We are unable to guarantee products that are not bought directly from Venkel Ltd. Should you have a question concerning genuine Venkel Ltd parts, we recommend that you contact your Account Manager or [compliance@venkel.com](mailto:compliance@venkel.com) to verify label authenticity and lot numbers.
